G.E.C. JOURNAL

OF SCIENCE AND TECHNOLOGY

VOLUME 32, 1965

Published by: **THE GENERAL ELECTRIC COMPANY LIMITED OF ENGLAND**

Head Office : P.O. Box No. 120, 1 Stanhope Gate, London, W.1

Correspondence to : The Editor, Hirst Research Centre, Wembley, Middlesex

INDEX

volume 32, 1965

Inclusive page numbers for the year's issues are :

No. 1 (February) ..... 1 to 5
No. 2 (June) ..... 53 to 9
No. 3 (October) ..... 97 to 14

PAGE

A

Aircraft landing aids, visual indication of glide plane 54
Apparatus for radiation research in space, four E.S.R.O. II satellite experiments 98
Arc-furnace flicker compensation in Ethiopia 2

B

Bombardment, electron—Conductivity induced by 85

C

Cables—Current rating of electric, the effect of new materials 11
Conduction mechanisms through thin insulating films 107
Conductivity induced by electron bombardment 85
Control of high-speed lifts, a continuous pattern system 117
Coventry Cathedral—Reinforcing the spoken word, a solution for 135
Crystals—Imperfections in single, direct observation by use of X-rays 63
Current rating of electric cables, the effect of new materials 11

D

Design of steam turbines for G.E.C. 500 MW generators 29
Discharge lamps — High-pressure sodium-vapour 37
Dynamometry—Precision, in testing electrical machines 38

PAG

E

Effect of new materials, the—Current rating of electric cables 1
Electroluminescence from silicon carbide *p-n* junctions 1
Electron bombardment—Conductivity induced by 8
Ellipsometric technique to measure oxide-film thickness at slipring rubbing surface 9
E.S.R.O.II satellite—four experiments, Apparatus for radiation research in space 9

F

Films, thin insulating—Conduction mechanisms through 1
Flicker compensation in Ethiopia—Arc-furnace 2
Flicker suppression for single-phase resistance-welding machines 7
Frequency synthesizers 7

G

Generators—Design of steam turbines for G.E.C. 500 MW 2
Glide plane—Aircraft landing aids, visual indication of 5

H

High-pressure sodium-vapour discharge lamps 3
High-speed lifts—Control of, a continuous-pattern system 11

I

Imperfections in single crystals, direct observation by use of X-rays 6

PAGE

L

Lamps—High-pressure sodium-vapour discharge 37
Lamps—Phosphors for 21
Landing aids—Aircraft, visual indication of glide plane 54
Lifts—Control of high-speed, a continuous-pattern system 117

M

Materials—Current rating of electric cables, the effect of new 11

O

Oxide-film thickness at slipring rubbing surface — Ellipsometric technique to measure 92

P

Personal portable radio telephones 125
Phosphors for lamps 21
Precision dynamometry in testing electrical machines 38

R

Radiation research in space—Apparatus for, four E.S.R.O. II experiments 98
Radio telephones—Personal portable 125
Reinforcing the spoken word, a solution for Coventry Cathedral 135
Resistance-welding machines, Flicker suppression for single-phase 79
Rubbing surface — Ellipsometric technique to measure oxide-film thickness at slipring 92

PAGE

S

Satellite, E.S.R.O.II, four experiments —Apparatus for radiation research in space 98
Silicon carbide *p-n* junctions—Electroluminescence from 15
Single crystals—Imperfections in, direct observation by use of X-rays 63
Slipring rubbing surface—Ellipsometric technique to measure oxide-film thickness at 92
Sodium-vapour discharge lamps—High-pressure 37
Spoken word—Reinforcing the, a solution for Coventry Cathedral 135
Synopses 52, 96, 144
Synthesizers, Frequency 73

T

Technical Literature 50, 93, 141
Testing electrical machines — Precision dynamometry in 38
Thin insulating films—Conduction mechanisms through 107
Turbines—Design of steam, for G.E.C. 500 MW generators 29

W

Welding machines — Flicker suppression for single-phase resistance 79

X

X-Rays—Imperfections in single crystals, direct observation by use of 63
